Bhopal, India | (+91) 8470980674 | jaishshresth143@gmail.com | linkedin.com/in/shresth-jaiswal | github.com/Shresth-11

SUMMARY

Full-stack software developer and CSE undergraduate at VIT Bhopal (CGPA: 8.35) with a strong foundation in data structures, algorithms, and OOP design. Hands-on experience building and deploying production-grade apps across the MERN stack and modern React ecosystem (Redux Toolkit, React Hook Form, TailwindCSS), with end-to-end ownership spanning REST API design, database modelling, BaaS integration (Appwrite), and cloud deployment (Vercel, MongoDB Atlas).

EDUCATION

B.Tech in Computer Science and Engineering — VIT Bhopal University (CGPA: 8.35)	2023 – Present
Intermediate — Bhavan's KDKVM School (Percentage: 82%)	2022 – 2023
High School — Bhavan's KDKVM (Percentage: 98.6%)	2020 – 2021

EXPERIENCE

Software Engineering Intern — Scramble Labs Technology Pvt. Ltd.	May 2025 – Aug 2025
Shipped 4 modular React.js + TypeScript components within a Next.js codebase, applying React.memo and useMemo for render optimization alongside Postman-driven API regression checks, cutting page load time by 15%.	

PROJECTS

Wanderlust	Code Live Demo
<i>MERN Stack (MongoDB, Express, React, Node.js), HTML, CSS, JavaScript</i>	
- Developed a full-stack Airbnb-inspired web app supporting 10+ listing categories with role-based access control. - Engineered 15+ RESTful API endpoints using Node.js and Express, with MongoDB (Mongoose) handling data persistence across all listing and user models. - Integrated JWT-based authentication and session management, securing access for registered users across all protected routes. - Designed a fully responsive React front-end rendering 50+ dynamic listing cards with live search and filters. - Deployed on Vercel with MongoDB Atlas, achieving consistent sub-2s page load times across device types.	

Typemate Rich Text Editor	Live Demo
<i>React.js, HTML, CSS, JavaScript</i>	
- Engineered a responsive rich text editor with 10+ formatting controls and an interactive splash screen. - Implemented a real-time “Smart Compose” ghost-text suggestion engine, cutting average keystrokes per sentence by ~35% through predictive state management. - Resolved focus conflicts across 8+ interactive toolbar components, ensuring zero accessibility regressions.	

BlogSphere	Code Live Demo
<i>React.js, Redux Toolkit, Appwrite, TailwindCSS, TinyMCE, React Hook Form</i>	
- Built a full-stack blogging platform with CRUD operations across 5+ post states, powered by a TinyMCE rich text editor. - Integrated Appwrite as a serverless backend handling user auth, session persistence, and cloud image storage — eliminating the need for a custom server entirely. - Architected global state with Redux Toolkit across 4 slices, reducing prop-drilling by ~100% and re-renders by ~40%. - Built 8+ form-validated components using React Hook Form and TailwindCSS, reducing form submission errors and achieving a fully responsive layout across all screen sizes.	

CERTIFICATIONS & ACTIVITIES

- NPTEL — Cloud Computing and Distributed Systems | Silver Category | 84/100 | Jan–Mar 2026
- NPTEL — Introduction to Internet of Things | Silver Category | 86/100 | Jan–Apr 2025
- Core Member, Notion Community — VIT Bhopal | Appointed via Letter of Appointment

SKILLS

Languages & DSA: Java, C++, Python, JavaScript — strong foundation in Data Structures & Algorithms

Frontend: React.js, Next.js, Redux, React Native, Vite, React Hook Form, React Router

Backend: Node.js, Express.js, FastAPI, RESTful API Design, EJS

Databases & Cloud: MongoDB, MySQL, Firebase, Microsoft Azure, MongoDB Atlas

Tools & DevOps: Git, Docker, Postman, Vercel, Figma, Canva
